Education

National Institute of Design
Master's, Information Design

Jan 2020 - Dec 2022
GPA: 8.38 / 10

PES University
Bachelor's, Visual Communication Design

Jan 2016 - Dec 2022
GPA: 9.89 / 10

Professional Experience

Boston Consulting Group
Senior Experience Designer

Gurgaon, Haryana, India
May 2023 - Present

- Youngest founding member of the design team at BCGX, implementing a robust design delivery process, articulating and enhancing project efficiency by demonstrating the measurable effects of design across different projects and sectors and cross-functional product delivery across regulated ecosystems
- Championed agile methodologies within cross-functional teams, enhancing collaboration and accelerating design iterations.
- Demonstrated leadership in design by mentoring junior designers and fostering a culture of innovation within the design team.

Fintech & Digital Payments

- Directed the design of India's next-generation digital payment rail, modernising a legacy payment system launched in 2025 by the RBI Governor in collaboration with NPCI, Bharat Bill Pay optimizing user experience for 1 billion users to fundamentally rewire internet banking, mobile banking and online merchant payments. [\[View live product here : https://www.bharat-connect.com/banking-connect/\]](#)
 - Presented and championed design concepts and system level interaction models to top stakeholders, including CEOs of India's leading banks, leadership teams of top payment aggregators and merchants, and the chief architect of Aadhaar, driving alignment and adoption across organisations and teams.
 - Collaborated with compliance, legal, and engineering teams to meticulously define solutions, ensuring all use cases met stringent regulatory requirements.
 - Delivered actionable UX insights and high-fidelity prototypes using figma and adobe tools within 2-3 days, significantly increasing project efficiency and strengthening product teams' responsiveness to user feedback.

Public Sector / Social Impact

- Spearheaded the design of a new investment portal for Bangladesh, increasing user engagement through intuitive product features and clear user flows. [\[View live website : https://banglabiz.gov.bd/\]](#)
 - Designed and presented clear flows, wireframes, and high-fidelity interfaces that balanced user needs, business goals, and regulatory constraints.
 - Orchestrated the brand identity, developed an understanding of competitive offerings and influence on new product features and defined key product metrics and design systems
 - Developed scalable design system and reusable UI patterns across digital government services.
- Drove the design of India's Adult TB Vaccination Program in partnership with the Central TB Division, NIH and WHO under the national health mission to develop bilingual training materials and pocketbooks that increased accessibility for frontline health workers in India. [\[View press releases and coverage\]](#)
 - Conducted extensive ethnographic research and usability testing across remote Indian villages, identifying critical knowledge gaps to enhance training effectiveness for frontline health workers and translated findings into accessible, bilingual interaction systems.
 - Facilitated design workshops with health service directors across all Indian states, co-creating solutions that improved inter-state coordination and increased program adoption

Healthcare and Automotive (Startup Experiences)

- Created and defined the brand language and visual design system for a new healthcare startup called 'Daily Bloom' in collaboration with Dr Reddys Labs for IBS Patients. [\[View live app here on playstore with 10k+ downloads\]](#)
 - Conducted UX audits, moved quickly from concept to prototyping to explore potential solutions and aligning stakeholders to deliver a cohesive user experience
- Designed a compelling brand identity and immersive digital assets for 'Trumigo,' a doorstep car service launched by Apollo Tyres
 - Designed the brand identity (logo), conducted usability testing to refine the service booking experience, and designed an immersive exhibition experience for brand visibility for the startup [\[View trumigo website\]](#)

Google
UI Design Intern II

Bangalore, Karnataka, India
Sep 2022 - Feb 2023

- Drove the design of a mobile-first educational document workflows under 'Android for India' design team for Google's 'Digital India' mission.

Selected Projects

- Created interactive prototypes and system-level interaction flows.
- Led user research across 2 Indian cities and synthesised insights for Google's 2023 User Experience Trend Report

Fractal Analytics

Mumbai, Maharashtra, India

Interaction Design Intern

Jan 2020 - Aug 2020

- Spearheaded end to end design of an internal enterprise travel platform as a founding design team member, integrating user research to create a seamless mobile and web interfaces.
- Facilitated workshops with cross-functional teams to foster co-creation, aligning product, engineering, and business teams to ensure that user-centric solutions were prioritized and effectively implemented.

Awards

- **BCG India CEO Spotlight Award 2024** : Received the CEO's Spotlight Award 2024 across BCG India for cultivating strong relationships with the client CEO, delivering a user-centered and compliant design that met business objectives in fintech.
- **Google's Spot Bonus Award 2022** : Recognised for curating an outstanding demo and talk for a lead visit.
- **Adobe Top Talent 2019** : Global Recognition for 2 projects in Illustration and Print and Graphic categories.
- **CNR Rao Merit Scholarship** : Top 10% academic performers consistently for seven semesters in Bachelor's.

Skills

Skills :

Execution : Human-Centered Design, User Experience (UX) & UI Design, Product Design, Interaction Design, Information Architecture, Visual Design, Design Systems, System Design, Information Visualization, iOS and Android Design, Design Research, Consumer Research, User Interviews, Discussion Guides, Heuristic Analysis, Design Audit, Usability Testing, A/B Testing, Wireframes & Mockups, Rapid Prototyping, Presentation & Storytelling, WCAG Compliant Design, Design Documentation

Product and Leadership : Product Management, End-to-End Ownership, Ambiguity Navigation, Project Management & Timelines, Driving Decision-Making, Managing Complex Workloads, Cross-Functional Team Alignment, Client Co-Creation, Executing Design Workshops, Managing Vendor Relationships, Managing Design Teams, Leadership, Mentorship & Teaching Design, Communication Skills, Active Listening, Accountable and Adaptable to Changing Client Needs, Reliable Team Member

AI and Innovation : Quick product visualisation and prototyping using Figma Make, exploratory concept creation, customer segment identification, interview guide prep using ChatGPT, Claude, Perplexity.

Design and Other Tools : Figma, Adobe Illustrator, Adobe Photoshop, Miroboard, PowerPoint, Keynote, Slides, Numbers, Excel, Sheets
